

ULTIMATE INTELLIGENT HOME GUIDE

ABSOLUTE AV

COMMON
SENSE
TECHNOLOGY

Editor's Note

Since 2003, we've been tailoring powerful technologies to fit the needs of businesses and homeowners. While the tech changes constantly, our clients count on our common-sense, personalized approach to stay the same day after day, year after year.

"I'm impressed by how they create a 'wow' experience and they make it simple and accessible for the user. The technology innovations they employ can make both the customer and employee experience more efficient and enjoyable." D. Manley

"We are so grateful for the incredible technology that Absolute AV brought into our lives. It has surpassed our imagination." Jackie S.

"I have worked with Richard and Absolute AV for many years. Richard knows equipment setup and configuration better than anyone I know." R. Jamieson

MAKE SURE YOUR HOME IS FULLY PROTECTED

Keep Intruders Out

Imagine having 24/7 access to your entry gate with the ability to see and talk to your guests, and let them in. If you are not home and waiting on a package, you can still let them in. Also, if you are expecting someone, you can give them a one-time access code. Don't want to put in a key code every time you come home? Don't worry! Every time you come home, your intelligent home will recognize you and automatically let you in.

Keep Intruders Away

Your home will always look like someone is there. Lights go on and off to give the illusion that you are home.

Let Your Home Protect Itself and Keep Your Family Safe

Monitor water leaks, dangerous temperatures, smoke, carbon monoxide, and pool equipment

Create a home that's able to handle the worst.

SHADING

Did you know?

You can have your shades set to automatically open and close. Experience waking up to natural light streaming through your window, save energy by having your shades close when the sun heats up the room, glares on the TV or open to allow natural light to stream in.

Why Good Air Quality is Important

We all spend a lot of time indoors. Having good air quality in your home will help your health and wellbeing.

Some health risks faced by having bad air quality are stress, fatigue, asthma, respiratory infection, headaches, or even fatal illnesses.

Environmental pollutants would be Carbon Monoxide, Nitrogen Dioxide, mold/mildew, lead particles, radon, or second-hand smoke.

You can take precautions by eliminating any known pollution and being aware of your surroundings. Are the books in your home starting to get musky or moldy? When you walk into your home, does it smell musky?

The problem is that not all pollutants can be identified easily, your intelligent home is equipped to assure you that you and your family are safe and healthy!

Lighting

WHAT PROPER LIGHTING WILL DO FOR YOU

With professionally-designed lighting, your home will be warm and welcoming. Set the mood, get tasks done, give your virtual meetings better quality, match your interior design, and even help you have a healthier life.

What Layering Consists of:

- Natural Lighting
- General Lighting
- Ambient Lighting
- Task Lighting
- Accent Lighting

When most people think of lighting in the home, they think of the basics. They don't think about using lights in their home as a design or lifestyle element that can be programmed to fit your family's mood, activities, or schedule.

“Lighting can make or break that great design.” - Richard Friesen

"WE WANT YOUR
HOME TO BE AN
EXPERIENCE."

DENISE SIMONS INTERIORS\ DENISE SIMONS

Lighting Scenes allow you to illuminate an area based on the lighting needs and activities you do there. It simplifies your routine by setting proper levels when you walk into the room..

GOODNIGHT

Turn off all the lights automatically at bedtime except for the ones that you decide to leave fully on like the porch or dimmed down like the hallway or stairs.

WAKEUP

Waking up to full brightness at 5:30 in the morning is painful. Lights slowly come on, to ease you through your morning routine. Automatically turn on your kitchen lights and enjoy a morning cup of coffee.

DINNER

Whether a family meal, quiet dinner for two or a quick snack, set the mood with a touch of a button. Perhaps send an alert to the household, such as flashing the lights on and off quickly to inform the family that dinner is ready!

READING

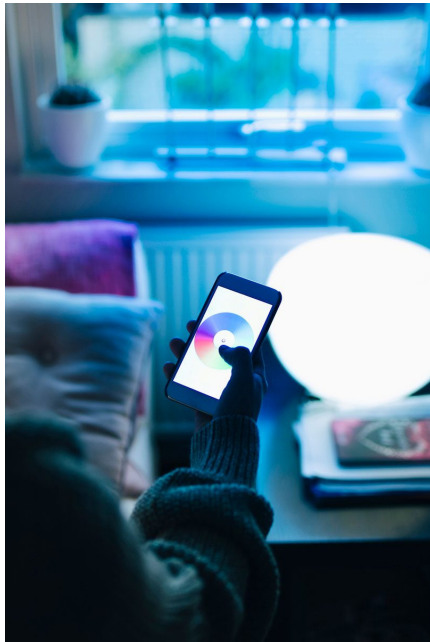

Imagine setting the lighting in your reading area while turning off all unnecessary lighting off when you sit down to read your favorite book in the evening.

VACATION

Evening and morning routines will continue as if you were home - peace of mind at its finest

PARTY

Welcome your guests, set comfortable levels for having conversations or dancing. Illuminate the counter-top where the food or bar is located.

MOVIE

Any distracting lights around the TV or home theater screen leave a path of light to the fridge or snack bar.

THE BENEFITS OF A HOME THEATER

Home theaters bring joy to the household. Everyone loves going to the movie theater for the full experience of the big screen, sound effects, and even the theater popcorn. Experience this in the comfort of your own home!

The Convenience of Having Your Own Home Theater

Never worry about the time it takes to get the family ready, load up in the vehicle, go across town, and get to your seats. Simply walk into the room, set the scene, and start the movie.

Customize It for Your Own Home

Having a theater in your home means you are in control of everything. You get to choose the furniture, equipment, decor, and even the snack bar!

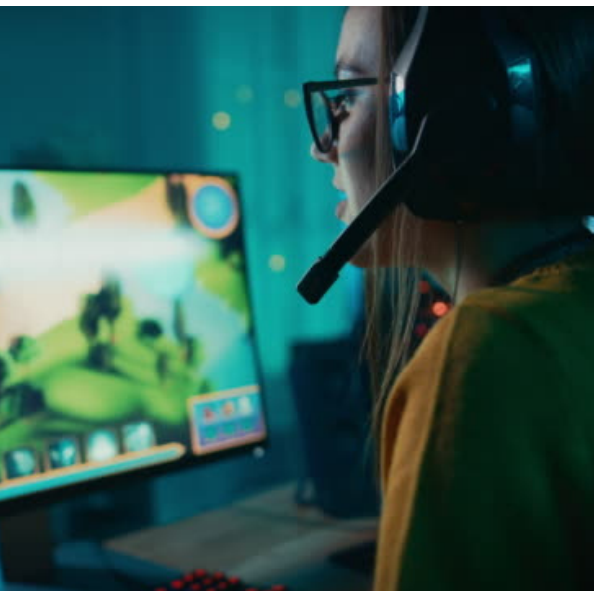

Complete Control

Not only do you have complete control over the movie, but you also of the environment. Are you too cold? You don't have to worry about bringing a sweater. Just turn up the heat!

Feel Like You Are At All The Sporting Events

Imagine having the perfect seats, big screen, and game day surround sound, it will feel like you are at the game! May the best fan win!

A Whole New Experience With Video Games

Do you like playing video games? With the big screen and sound effects, it will create an amazing experience when playing your video games. You will be so spoiled that you will never want to go back to a small screen or regular sound again!

AUDIO IN EVERY ROOM

Sometimes music is the only medicine the
heart and soul needs!

HERE ARE 5 REASONS TO USE AUDIO IN EVERY ROOM

1) Never miss a delivery or guest. Play a chime in every appropriate room. Jamming out, no problem, the music will pause, allowing the notice to be heard.

EVERYONE HAS A CHOICE

2) Does everyone want to listen to their own music? No problem! Each room can support different audio sources! While mom and dad are dancing in the living room to their favorite song, the children can be tucked in bed, falling asleep to their bedtime playlist.

KEEP THE PARTY IN EVERY ROOM

3) Having a party? Keep guests happy by having music playing everywhere they go. Whether the guests are outside, in the living room, in the dining room, or in the kitchen, they can keep listening to the beautiful music.

CHOOSE HOW YOU WAKE UP

4) Everyone gets irritated waking up to the loud annoying alarm clock. Imagine waking up to the music of your choice? Whether it's soft music, motivational, or nature sounds, you could start your day off right. Your morning playlist would stream through your bedroom speakers to give you the smile you deserve.

KEEP DANGER AWAY

5) If carbon monoxide, smoke, or a water leak, is detected, your music will pause and send an alarm or message through your audio system. Also, if intruders are present scare them off by sounding off a loud alarm in every room of your home!

Temperature and Climate Control

Life is way too busy to always worry about the temperature in your home. It's time to get rid of those hard to use and out of date thermostats.

WHAT ARE THE BENEFITS?

DON'T WORRY ABOUT THE TEMPERATURE AND CLIMATE CONTROL. LET YOUR INTELLIGENT HOME DO IT FOR YOU!

Humidity, air purifiers, heating or air conditioning - seamlessly working together based on who is in the room. That's Intelligent

TRACK THE ENERGY THAT YOU USE

Receive an energy report that shows you how much power you have used and how it has changed over time.

DONT WORRY ABOUT TRACKING THE WEATHER

Your intelligent home doesn't track weather from 30+ miles away. It tracks it right from your backyard! If you don't realize a cold front is coming in, don't worry. The pool equipment won't freeze, it will be running based on the conditions at your home.

LOWER YOUR ENERGY COST

A comfortable home along with saving money. Pre-set your automated cooling and heating system to come on 30 minutes before you get out of bed, or turn off when you leave for work, and turn back on 30 minutes before you get home so that you will always feel comfortable but also save money and energy.

CONTROL FROM YOUR PHONE

Whether you're coming home from work early or on vacation, control the temperature from your phone. If you're coming home early enjoy a comfortable environment when you arrive, receive alerts on your vacation if the interior temperature in your home has gotten to dangerous temperatures.

MOVEMENT SENSORS AND LONG-TERM LEARNING

Tired of remembering to change the temperature, allow the intelligence of the system to learn your family's routine and save you time.

EASE YOUR MIND WHILE ON VACATION

SEE WHAT YOUR INTELLIGENT HOME CAN DO

A photograph of a family walking away from the camera on a sandy path towards the ocean. The father is in the foreground, carrying a striped beach bag. The mother is next to him, and two children are walking ahead. The ocean is visible in the background under a clear sky.

We all like to relax
and have fun while
on vacation, but we
can't help to worry
about our homes.
Ease your mind
with a push of a
button. Put your
intelligent home
into vacation mode
anytime you travel.

HAVE CONTROL OF YOUR HOME

Ensure doors are properly locked. If for some reason, you need to let someone into your home, give them access from wherever you are.

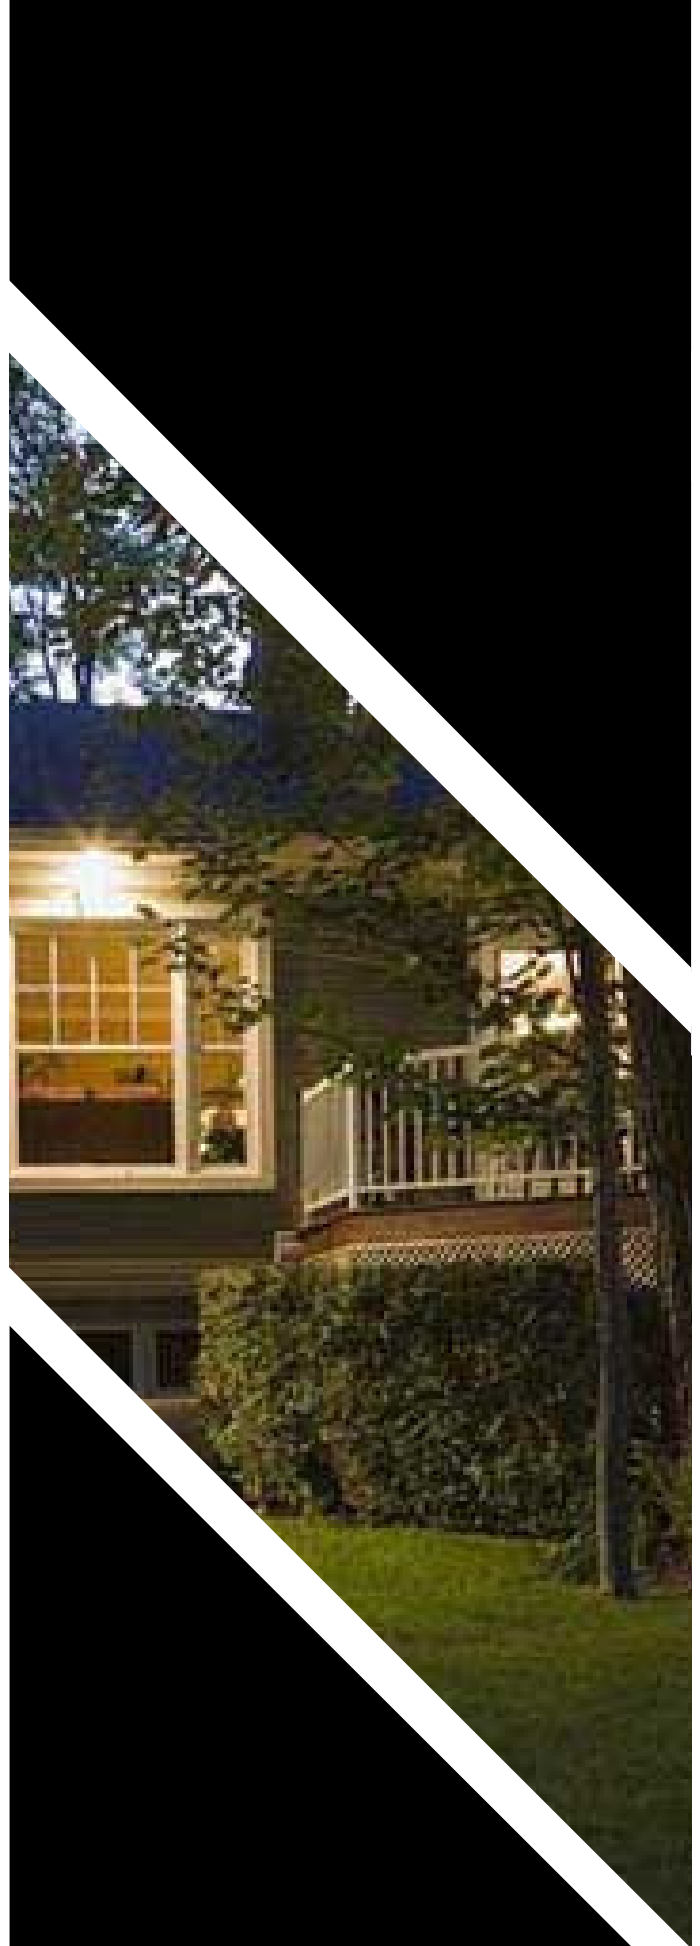

Also, view who is at the door with the video doorbell and even communicate with them.

MAKE IT SEEM LIKE YOU ARE STILL HOME

Putting your intelligent home into vacation mode will set the proper temperature, water the lawn, simulate your routine while your lights go on and off to make it seem like someone is at home. This will help keep intruders away.

DON'T WORRY ABOUT THE TEMPERATURE OF YOUR HOME

Let your intelligent home take care of it for you. It will automatically turn on and off depending on if your home is getting too hot or cold. You can also have it turn on when you are headed back so that you get a cozy welcome home.

LET YOUR DETECTORS AND SENSORS DO THEIR JOB

The detectors and sensors will help keep your home protected while you are gone. Whether it's smoke or a water leak, get notified of any dangers happening at home.

KEEP YOUR HOME SAFE FROM INTRUDERS

Your phone will notify you of any suspicious activity going on at home. If an uninvited guest arrives at your home, you will be notified. If you don't answer, it will notify someone close to you. An alarm will start going off, all the shades will open, and all the lights will turn on.

CHECK YOUR PHONE WHEN YOU NEED REASSURANCE

Are you still worried even with everything in vacation mode? It's okay!

Keep an eye on your home with a look at your phone. You'll also get notifications through your phone if anything is going wrong.

GIVE YOURSELF AN OUTDOOR OASIS

Relaxing shouldn't be confined to the inside of your home. Let us help you take the technology to your backyard. Whether you're having a family night, having a barbeque with friends, or just having some time to yourself, let us help you make it convenient and enjoyable!

WHATEVER YOU'RE DOING, BARBECUING, RELAXING IN THE SUN, WATCHING A MOVIE, HAVING A PARTY, SWIMMING, OR JUST PLAYING WITH THE KIDS.

- What do you do when the guests are at the door, but you are in the backyard getting prepared? Unlock the door for them by pressing a button on your phone.
- Ready for a movie night? Simply get it ready by pushing a button. Start the movie on your outside TV, activate the speakers, and adjust the lights.
- While you are at the grill, ask your voice assistant to turn on the patio lights, and when the food is ready, use the intercom feature on your app to inform your family and guests that the food is ready!
- Touch screens allow not only the family but also guests to adjust lights, change songs and playlists, and even set up entire scenes.
- Relaxing and don't want to get up? Use the app on your phone to turn on the fire pit and lights.
- Schedule the pool temperature to adjust automatically.
- With speakers and TVs made for the outdoors, there is no more hassle with having to take everything inside when the weather gets bad, or it is time to go inside. Also, press one button on a lighting keypad and turn it all off!

SET THE SCENE WITH ROUTINES

MORNING ROUTINE

Imagine waking up to your favorite music, and the lights gradually coming on or imitating a sunrise. Getting out of bed with the house cozy and warm. No need to go make coffee because it has already started. You go to get in the shower or bath where the water is already running at the perfect temperature.

During the evening, your intelligent home can close all the shades for you. It can turn on the lights and even turn the evening news on for you!

EVENING ROUTINE

BEDTIME ROUTINE

What if all you had to do was get you and your family ready for bed, and your home could do the rest? Let your home take care of the lights, locking the doors, setting the temperature, turning on your bedtime playlist, and even dimming the lights in your room if you like to fall asleep reading.

These don't have to be dreams. They can be your reality!

MAKING THE COMPLEX SIMPLE

Whether it's for a home or business, our approach is the same: making the complex simple with common-sense technology. A lot of our work falls under the umbrella of what some call "home automation." But as the tech has advanced, home automation doesn't begin to capture all possibilities for shaping your environment. We call it Pure Control: Managing your environment from almost any device to control operating costs and conserve energy.
